# Back in time

By: Ben          3rd Grade

A boy named Max loved making robots, portals, and other cool stuff. Once he made a portal that can make you go back in time. First (so he would not die) he threw an apple into the portal and came back in one peace. So he jumped in the portal and BOOM. He landed in the time of the Dinosaurs. ROAR went a T-REX "I got to hide" said Max.

He saw a cave and ran to it. It was dark and Max was safe "I got to get out of here" said max so he pulled a mini portal out of his pocket and slammed it to the ground and a portal popped up. Max jumped in the portal but he did not go back home he landed in the ocean. And he saw a great white shark coming his way. Max just stay still. ONE HOUR LALER. The shark was gone " finally," Max said. And got the mini portal out and went home. And from here on out Max will never make that mistake again.

# THE END
