

ADVENTURES OF SPARKY AND MITTENS

Sparky is a cat and he has spots that are black and white. Mittens is a cat that is black and white and her paws are all white. But the rest of her is black. Sparky and Mittens are siblings and friends, and they have special powers.

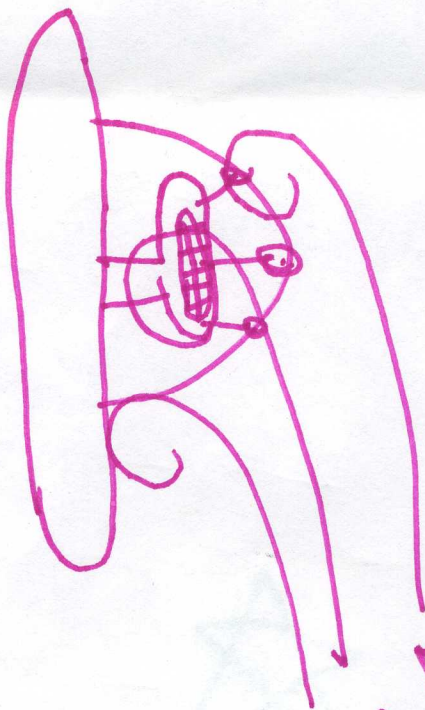

One day in the forest, Sparky and Mittens were looking for fish in the river. Then they heard a dog barking. It was their friend Noodles, but he didn't have special powers. They went to see what was happening. A bunch of aliens were coming down from their spaceships. They had freezing rays and didn't look friendly. POW! Sparky hit the spaceship with his laser eyes. Then an alien jumped down with his parachute holding a freeze-ray and aimed it at Mittens. Mittens zipped away just in time. The alien's freeze ray froze the grass from waving in the wind. Noodles ran to town and started barking to warn people from the aliens, but the alien ships started following Noodles. Sparky and Mittens chased the alien ships. The aliens didn't want to be seen by the people so they created a portal. (This is the way they came to Earth). Sparky, Mittens and Noodles chased the aliens into the portal and ended up on the alien planet called Eekanarg.

Eekanarg was made of granite. Even the houses, the trees, the plants, and even the dirt was made of granite. Everything was smooth. And the aliens were not far behind.. Sparky and Mittens and Noodles had to act fast.

Sparky, Mittens and Noodles slid across the smooth ground, but Eekanarg was a flat planet. They were at the very edge so they turned and ran the other way. Then the alien ships moved off Eekanarg and flew away into space.

Sparky, Mittens and Noodles saw the portal and were running towards it. The portal was just big enough to get Sparky, Mittens and Noodles back safely to Earth. Sparky, Mittens and Noodles got back to Earth and never saw the aliens again.

THE END

SSSSSSSS
