

Fairy Tales of Wild Tails

Saturday, July 17 at 10:30am

Fairy Friends far & wide are known for their interesting tails. From bushy squirrel tails & powerful beaver tails to the quick flick of a white-tailed deer tail - all woodland creatures use their tails to signal, play, warn, and move. Fairies have learned these tricks and more, and are ready to pass on what they know to you!

Families of all ages are invited to come & explore Tales of Tails with the Sheckells Family!

Registration is required for this outside program.
